## 1.Gigo Connect-A-Cube Block units

With Gigo Connect-A-Cube blocks children can twist and turn their way to their amazing cognitive potentials!

Every block is a 2cm cube with 1 fixed peg and 5 sockets. The original idea for the product was represented by “dots” sketched on graph paper which could be demonstrated in 3D forms. Through this design all Gigo block pieces can be connected to one another by using identical square planes. The point in the center was used to combine the 12 square dots. In other words, with just 12 Gigo blocks there can be  $12! \times 4^2 = 958,000,000$  different combinations. Thus were born learning blocks with the most variations known to Man.

With the cube, the triangle, the convex, the concave, and the peg and peg remover, children can assemble whatever they want to innovate and even build their dream castles.

With this package Heavy Vehicles, your children will build 10 different models: a Bulldozer, a Dump Truck, a Deep Plow, a Clement Truck, a Crane Truck, a Road Roller, a Fork Lift Truck, a Excavator, a Tow Truck, and a Tower Crane. Parents and children will take a real pleasure to play together. Nothing better to stimulate the creativity of the whole family.

## 2.Gigo blocks features

The endlessly fun Gigo blocks carry 3 major features:

- Represented by "dot" – Simple, yet with the most variations in the world.
- Learning through hands-on playing – Gigo blocks offer children a chance to understand mankind's amazing cognitive abilities.
- A learning tool for future leaders – Gigo blocks encourage critical thinking and creativity.

## 3.Gigo blocks functions

The colorful Gigo blocks are 2cm cubes appropriate for any 3 to 6 year old children to build, twist and turn into any desired shape. The hands-on experience will stimulate their cognitive abilities.

Children playing with Gigo blocks will gain insight into the basic laws of mathematics, physics, and engineering. Playing Gigo blocks can also improve children's muscular-motor senses, sense of balance, eye-hand coordination, and integrated neurological functions. Moreover, Gigo blocks can help children cultivate patience, focus, imagination, and creativity.

Who knows? With the stimulation from Gigo blocks your child might just grow up to become a great scientist, architect, or inventor!

Gigo blocks offer excitingly stimulating, fun, and creative experiences. Visit different planets far away, animals of the sky and oceans, dinosaurs from ancient times, and travel in a rocket through space, and enjoy great family activities together.

Every Gigo block set comes with an instruction manual. You can start by mimicking the combinations on the instruction manual with your children. Once children become familiar with Gigo blocks you will be amazed by their incredible creative powers.
